Summary

Third-year Bachelor of Computer Information Systems student with experience in data analysis, SQL, relational databases, software development, and business requirements analysis. Experienced in querying and interpreting structured data and translating technical and business requirements into functional solutions. Strong analytical, communication, and problem-solving skills developed through technical projects, customer service, and team leadership. Interested in applying data and analytics skills to support business decision-making, sales analysis, and operational improvement.

Technical Skills

- **Programming & Data:** Python, Java, C, SQL, relational databases, data querying and analysis
- **Web Development:** Next.js, Tailwind CSS, HTML/CSS
- **Tools:** Git, Visual Studio Code, Vercel, Microsoft Excel, Word, PowerPoint
- **Information Systems:** Systems analysis, system administration fundamentals, requirements analysis, software testing and troubleshooting
- **Professional:** Client communication, teamwork, analytical problem-solving, adaptability, organization, leadership, time management

Education

Bachelor of Computer Information Systems
Mount Royal University, Calgary, AB
Expected Graduation: April 2028

- **Relevant Coursework:** Data Modeling and Query Languages, Data Structures, Introduction to Problem Solving and Programming, Object-Oriented Programming, Systems Analysis, System Administration and Maintenance, Client Development

Relevant Experience

FlowLine – AI-Powered Pipeline Hazard Forecasting & Risk Management Platform
IEEE Young Professionals Industry Hackathon 2026 | Team Project

Technologies: Next.js, React, TypeScript, Python, FastAPI, PostgreSQL, Tailwind CSS, LightGBM, Mapbox

- Collaborated in a team to develop a full-stack pipeline risk management platform using historical Canada Energy Regulator (CER) data to support hazard forecasting and inspection prioritization.
- Developed an interactive dashboard with geospatial mapping, pipeline incident visualization, risk rankings, and adjustable risk assessment parameters.
- Integrated machine learning-based hazard forecasts and AI-assisted insights to support data-driven decision-making and emergency preparedness.
- Contributed to a platform that recommends emergency response resources, identifies historical incident patterns, and supports crew dispatch based on driving times.

J&S Streakless Business Website | Web Development Project | May 2026

- Translated business requirements into a functional digital solution by designing, developing, testing, and deploying a production business website using Next.js and Tailwind CSS.
- Tested website functionality across devices, identified technical issues, evaluated potential solutions, and implemented corrections prior to production deployment.
- Maintained and updated website content and functionality based on changing business requirements.
- Managed deployment and ongoing updates using Vercel and Git.

Work Experience

Sales Associate – Sherwin Williams, Calgary, AB

June 2025 – Jan 2026

- Identified customer needs, evaluated available options, and recommended appropriate solutions in a client-facing environment.
- Communicated technical product information clearly to customers with varying levels of knowledge and experience.
- Investigated customer concerns and collaborated with team members to resolve issues effectively.
- Managed multiple responsibilities while maintaining accurate, professional, and timely service.

Painter Lead - Crystal Stoneworks Ltd, Calgary, AB

May 2022 - Dec 2024

- Trained and supervised team members on workplace safety procedures, proper work techniques, and job expectations to promote safe and consistent completion of work.
- Coordinated daily work assignments and communicated requirements and procedures to painters and helpers.
- Monitored work quality and identified issues requiring correction or additional guidance.
- Communicated professionally with clients and team members regarding project requirements, progress, concerns, and solutions.

Volunteer Experience

Mentor – Youth Improvement Group, Calgary, AB
Nov 2023 – Present

- Mentor youth by providing guidance, explaining concepts clearly, and adapting communication to individual needs and levels of understanding.
